The overall teaching, learning process in our institution is very good

I think teachers should be interact with students with very impressively and they would not use multimedia or projector and laptop they should just explain concepts very clearly from the book or other materials instead of reading from slides and last but not the least I think college library should be open at least 6 PM means the student who are can pay the study point they will definitely benefited from this and library would have separate compartments for girls and boys

Should be more consultative
